xOrganizer V2 Compatibility for X-Plane 12
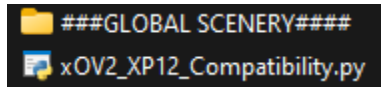

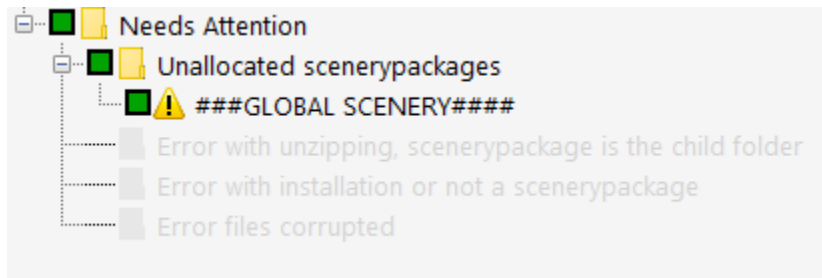

Installation Guide:
Drag the ###GLOBAL SCENERY### and the xO11_XP12_Compatibility.py into the X-Plane 12 Custom Scenery Folder:

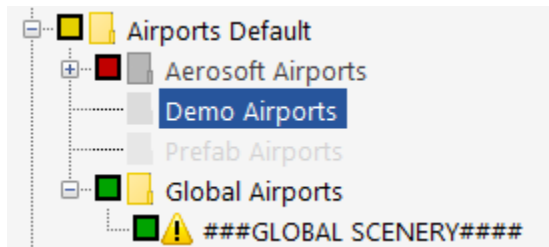

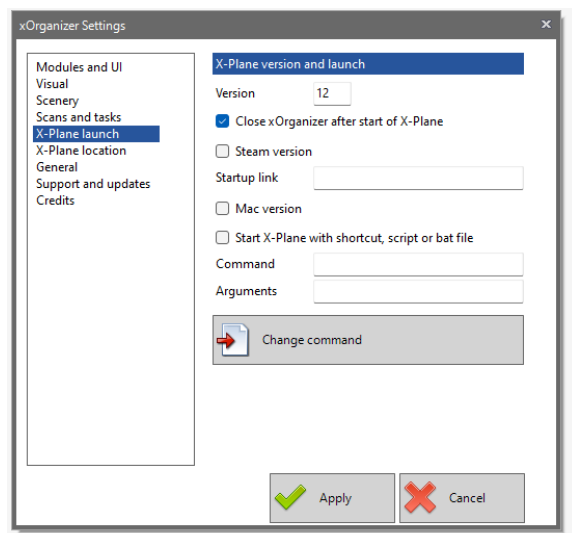

Open xOrganizer V2:

At first the ###GLOBAL SCENERY### will be in the Needs Attention Folder:

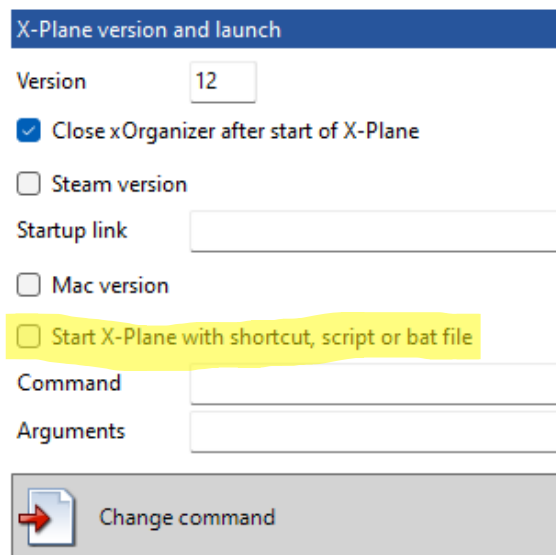

Drag the ###GLOBAL SCENERY### into the Airports Default and Global Airports folder:

Now open the settings and head to the X-Plane launch Tab:

Here click on "Start X-Plane with shortcut, script or bat file":

This should bring up this window. If not, select change command.
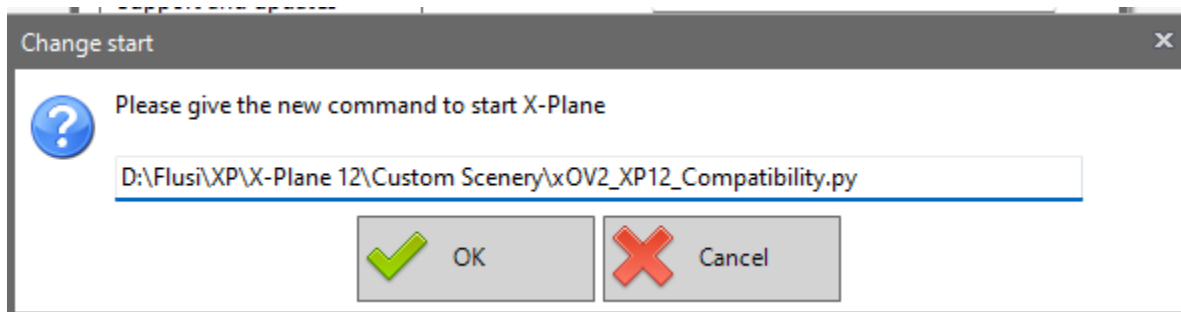

Now add the Path of the Python File in the textbox. In my case it looks like this:
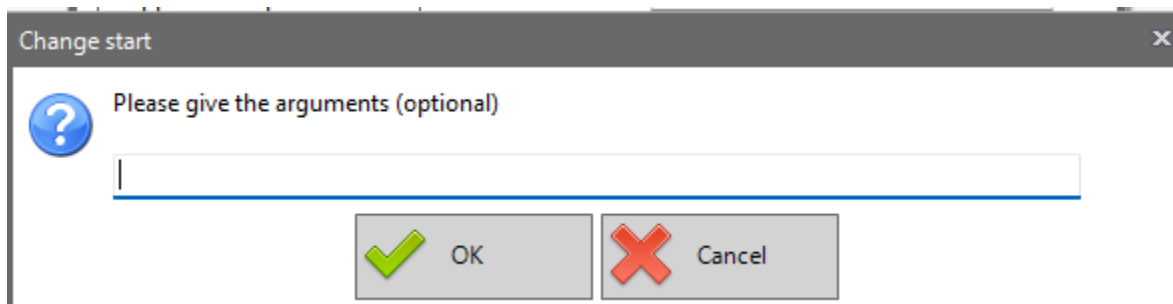

Once you click OK, another window appears. Leave it empty and click OK again.

Now you are set. You can use xOrganizer V2 for X-Plane 12
